

Autocomplete Google Address

Description:

Autocomplete Google Address help your customers to locate and select accurate address from google address dropdown. This module speeds-up checkout step by auto-filling city, state, zipcode and country selection from address.

Installation Guide:

Follow these steps to install the module.

1. Go to “**Modules → Modules**” menu.
2. Click “**add a new module/Upload a module**” or “**+**” button.
3. Upload module package “**google_address.zip**” file.
4. After successful upload, click “**install**” button to install the module (module will be auto installed in Prestashop 1.7.x.x after successful installation).

Note: *We suggest you to take a clean backup before applying any changes.*

Recommendation:

- Clear your store “**Cache**” after successful installation.

Configuration:

Follow below steps to configure module settings.

- Go to **“Modules → Modules”**.
- Search and find **Autocomplete Google Address** module and click **“Configure”**.
